

INVESQUE INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2019

November 13, 2019

Basis of presentation

Financial data in this Management's Discussion and Analysis of Results of Operations and Financial Condition ("MD&A") is for the three and nine months ended September 30, 2019. Financial data has been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board.

This MD&A is intended to provide readers with an assessment of the performance of Invesque Inc. (the "Company") for the three and nine month ended September 30, 2019. This MD&A should be read in conjunction with the audited consolidated financial statements and notes of the Company for the years ended December 31, 2018 and 2017, the unaudited MD&A for the year ended December 31, 2018, and the unaudited condensed consolidated interim financial statements and notes of the Company for the three and nine months ended September 30, 2019 and 2018.

Additional information relating to the Company, including the Company's annual information form for the year ended December 31, 2018 (the "2018 AIF"), can be found on SEDAR at www.sedar.com.

All financial information is in thousands of U.S. dollars unless otherwise noted.

Forward-looking disclaimer

Certain information in this MD&A may constitute "forward-looking" statements which involve known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements of the Company or industry results to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements (which involve significant risks and uncertainties and should not be read as guarantees of future performance or results) include statements related to, among other things, the expected seniors housing and care industry and demographic trends, acquisitions, development activities, future maintenance and leasing expenditures, financing, the availability of financing sources and income taxes. Management of the Company ("Management") believes that the expectations reflected in forward-looking statements are based upon reasonable assumptions; however, Management can give no assurance that actual results will be consistent with these forward-looking statements.

Without limiting the foregoing, the words "believe", "expect", "anticipate", "should", "may", "will", "intend", "estimate" and similar expressions identify forward-looking statements.

Factors that could cause actual results, performance or achievements to differ materially from those expressed or implied by forward-looking statements include, but are not limited to, general economic conditions, competitive uncertainties and contingencies, demographic and industry trends, legislative and regulatory changes, tax laws and those factors set forth under the heading "Risks and Uncertainties" in this MD&A and 2018 AIF. Readers are cautioned that the foregoing list of factors that may affect future results is not exhaustive. When relying on forward-looking statements to make decisions, with respect to the Company, investors and others should carefully consider the foregoing factors and other uncertainties and potential events.

These forward-looking statements are made as of November 13, 2019 and the Company assumes no obligation to update or revise them to reflect new events or circumstances, except as required by law.

Financial Measures not Defined Under IFRS

Certain terms used in this MD&A are performance measures that are not defined by IFRS such as Funds From Operations ("FFO"), Adjusted Funds From Operations ("AFFO"), fixed charge coverage ratio, payout ratio, effective payout ratio, earnings before interest, income taxes, depreciation, amortization and rent ("EBITDAR"), earnings before interest, income taxes, depreciation, amortization, rent and management fees ("EBITDARM") and any related per share amounts used by the Company to measure, compare and explain the operating results and financial performance of the Company. Such performance measures do not have standardized meanings under IFRS and therefore may not be comparable to similar measures presented by other issuers. Such performance measures should not be construed as alternatives to income (loss) and comprehensive income (loss) or cash flows from operating activities calculated in accordance with IFRS. Further, the supplemental measures used by management may not be comparable to similar measures presented by other real estate enterprises. Management believes that these terms are relevant measures in comparing the Company's performance to industry data and assessing its ability to meet its ongoing obligations. Please refer to the "Financial Measures not Defined Under IFRS" section of this MD&A.

Business Overview

Invesque Inc. is a corporation continued under the *Business Corporations Act* (British Columbia). The registered office of the Company is located at 700 W Georgia Street, 25th Floor, Vancouver, British Columbia V7Y 1B3 and the head office of the Company is located at 333 Bay Street, Suite 3400, Toronto, Ontario, M5H 2S7.

The Company is a North American health care real estate company with a growing portfolio of high quality health care properties and medical office buildings located in the United States and Canada that partners with industry leading operators to invest across the health care spectrum. The Company's current portfolio includes investments in independent living, assisted living, memory care, skilled nursing, transitional care, and medical office properties, which are operated primarily under long-term leases and joint venture arrangements. The Company's current portfolio also includes investments in owner occupied seniors housing properties, in which the Company owns the real estate and also provides management services through its subsidiary management company.

For the Company's seniors housing properties, it generally owns the land and buildings and leases them to operators on a long-term, triple-net lease basis, has an interest in both the property and operations in joint ventures and joint arrangements with the operating partner at the facility, or wholly owns and operates the property. Under a triple-net lease structure, the tenant operators assume the operational risks and expenses associated with operating a seniors housing and care facility on the leased premises. The tenant operators provide and manage the service offerings available at the facilities, deliver all care services, and maintain the buildings.

The Company's multi-tenant medical office portfolio is operated via third party property and asset management contracts with Mohawk Realty Advisors Ltd ("Mohawk").

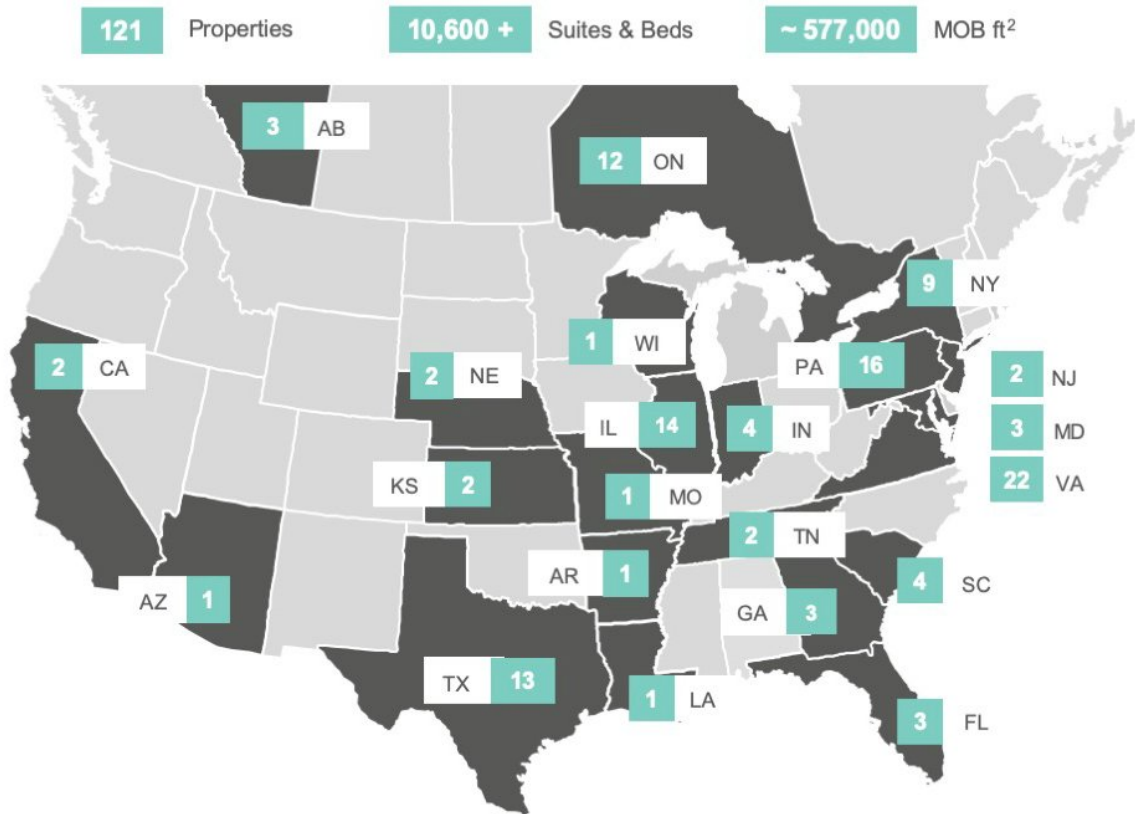

Description of the Company's asset types are as follows:

- **Independent Living ("IL") Communities:** IL communities are the least medically-intensive type of seniors housing and care properties. These communities are designed to serve the healthiest residents among seniors housing and care properties. IL communities come in many forms ranging from age-restricted apartment communities to villa homes which are on a retirement village campus. IL communities in North America are generally unregulated and unlicensed, and most receive revenue solely through private pay sources.
- **Assisted Living ("AL") Communities:** AL communities provide relatively independent elderly persons with typical amenities associated with less medically-intensive senior housing and care as well as assistance with activities of daily living and some healthcare services. Services provided at AL communities typically include 24-hour care for resident protection, an emergency response system, dining, housekeeping, maintenance and transportation. A growing number of AL communities offer services specifically designed for residents with Alzheimer's and/or memory care needs. AL communities in the United States are typically licensed and regulated by state and local governments rather than the federal government. In Canada, AL communities are licensed or certified and regulated in most jurisdictions. AL communities receive revenue from private pay and/or third-party pay sources.
- **Skilled Nursing Facilities ("SNFs") and Transitional Care Centers ("TCCs"):** SNFs (referred to as Long-Term Care Facilities ("LTCs") in Canada) are senior care facilities that provide assistance with daily life activities and have licensed nursing staff on duty 24 hours per day. These facilities provide the most intensive level of medical and nursing care in a residential setting for seniors, typically treating residents with physical or mental impairments that prevent them from living in IL or AL communities. In many cases, these facilities supplement hospital care by providing care to patients who require medical and therapeutic services but are stable enough to have these services provided in a facility that is less expensive than a hospital or other post-acute care setting. SNFs also provide transitional care services, often referred to as TCCs, which are designed for post-operative patients transitioning from the hospital to their home. SNFs and LTCs in North America are subject to extensive federal, state and provincial regulation, and primarily rely on government reimbursement and third-party insurance providers for payment.
- **Medical Office Buildings ("MOB"):** MOB represent a large segment of health care real estate comprised of various outpatient health care settings. Outpatient care, sometimes referred to as ambulatory care, is defined as medical care or treatment that does not require an overnight stay in a hospital or medical facility. The MOB segment is one of the largest segments of outpatient care. Ownership of outpatient care settings and MOB is highly fragmented; typical owners include hospitals, health systems, independent physicians and physician groups, individual investors and institutional real estate owners, such as real estate investment trusts. Unlike seniors housing and care properties, the

utilization of outpatient care settings and MOBs is generally not age restricted and is available to all segments of the population.

As of November 13, 2019, the Company owns or has a majority interest in a portfolio of 106 properties in the United States, comprised of 69 assisted living and memory care facilities, 17 skilled nursing facilities, 13 transitional care properties, and 4 medical office buildings. In Canada, the Company owns an interest in 15 properties comprised of 11 medical office buildings and 4 seniors housing and care facilities.

The Company's geographic footprint as of November 13, 2019:

Management believes that certain characteristics of the North American seniors housing and care industry, including favorable demographic trends, increasing demand with stagnant supply of new facilities and the shift from high cost hospitals for post-acute care to lower cost settings such as skilled nursing facilities, provide for a unique investment opportunity. The increased demand for healthcare facilities further enforces the growing demand for healthcare spending in medical office buildings as well. Management also believes that, as a result of the high quality of the Company's properties, its triple-net lease and joint venture structures and its relationships with reputable operators and industry participants, the Company is well-positioned to succeed in the industry by capitalizing on these market opportunities.

Recent Activities

Recent Acquisitions and disposition

The following asset acquisitions and dispositions were completed during the nine months ended September 30, 2019:

	\$ 8,136	\$ 50,737	\$ (14,887)	\$ 29,962	\$ 73,948

On January 16, 2019, the Company acquired a memory care facility leased to an operator located in Allen, TX for a contractual purchase price of \$8,100 plus transaction costs. The Company entered into a new mortgage secured by the property to fund \$5,693 of the purchase price and funded the remainder of the purchase with cash on hand.

On March 15, 2019, the Company acquired a skilled nursing property located in Oswego, IL for a contractual purchase price of \$22,000 plus transaction costs funded with cash on hand. The building is operated by an affiliate of the tenant operator of the Symphony Portfolio ("Symcare"). The original master lease with Symcare was amended to include this new building.

On April 30, 2019, the Company purchased two buildings located in Chicago, IL and Glendale, WI from affiliates of Symcare for a contractual purchase price of \$30,000 plus transaction costs. The transaction was funded by the issuance of 555,556 common shares and cash on hand. The original master lease with the Symcare operator was amended to include these new buildings.

On June 28, 2019, the Company sold its interest in a property located in Mooresville, IN for total consideration of \$15,000, less transaction costs. This was the only property in the portfolio being leased by this operator, and the Company believes its resources can be better utilized in other relationships with more growth opportunity. The consideration was paid in the form of cash and a \$5,000 loan receivable issued to the buyer of the property. The loan receivable is interest only at an annual rate of 8.5% and matures July 1, 2024.

On August 30, 2019, the Company purchased three memory care facilities located in Fishers, IN; Greenwood, IN; and Zionsville, IN for a total contractual purchase price of \$30,786, plus transaction costs. The transaction was funded by the repayment of \$2,300 of outstanding loans receivable principal and accrued interest, issuance of \$2,049 in Class B LP units with the right to exchange units into common shares of the Company at the option of the unit holder ("Exchangeable Units"), and cash on hand.

Recent business combination

On August 1, 2019, a wholly owned subsidiary of the Company closed on a portion of the previously announced acquisition of Commonwealth Senior Living, LLC ("Commonwealth"). The acquisition includes 17 private pay seniors housing properties in addition to the Commonwealth management company. The Commonwealth management company operates all 17 properties in the Commonwealth portfolio and operates seven properties outside of the portfolio owned by Invesque. The August 1, 2019 acquisition represents the first tranche of the acquisition of Commonwealth properties, and the Company remains committed to purchasing three additional properties as previously announced, subject to the approval of certain lenders of secured debt underlying the remaining three properties.

	Commonwealth	
Properties Acquired		17
Property, plant and equipment	\$	285,872
Construction in progress		893
Assumption of mortgages payable		(9,523)
Working capital balances		(2,419)
	\$	274,823
Consideration paid:		
Issuance of preferred units		53,587
Proceeds from Commonwealth Facility		174,074
Cash on hand		47,162
	\$	274,823

The total contractual purchase price for the 17 properties and management company was \$285,357, subject to working capital adjustments and transaction costs. The acquisition was funded through \$176,000 in new debt secured by 16 of the properties ("Commonwealth Facility"), the assumption of \$9,537 in debt secured by one of the properties, the issuance of \$53,587 of preferred interests in the Company's acquiring subsidiary entity and cash on hand.

The \$176,000 Commonwealth Facility secured by 16 properties has a maturity date of August 1, 2024, with two available extension options. It bears interest at a rate of LIBOR plus 215 basis points, but concurrent with the closing of the acquisition the Company entered into an interest rate swap agreement to fix LIBOR at 169 basis points through August 1, 2024, effectively fixing the interest rate at 3.84% for its initial five year term. The agreement also provides for an accordion feature that would extend the capacity of the Commonwealth Facility by an additional \$50,000 subject to certain terms and conditions provided for in the agreement.

The \$53,587 in preferred interests will initially be exchangeable by holders into common shares of the Company at a fixed exchange price of \$9.75 per common share. The preferred interests have an initial dividend rate of 6.50% per annum and a liquidation value equal to their unreturned initial capital contribution and any accrued and unpaid dividends. Under certain circumstances, the Company will have the right to redeem the preferred interests at its discretion for an amount specified in the operating agreement.

Greenfield Transition

The Company agreed to terms with Greenfield Senior Living ("Greenfield") whereby the Company will acquire 100% of Greenfield's interests in 13 properties in which the Company already has an ownership interest for total consideration of approximately \$4,500. Ten of these properties were previously triple-net leased to affiliates of Greenfield and the Company will acquire Greenfield's interest in the operations at each property. Three of the properties were previously joint arrangements between the Company and Greenfield, and the Company will acquire Greenfield's interest in both the real estate and the operations of these properties. The Company has transitioned the operations in 10 of the 13 properties pursuant to interim management agreements pending final regulatory approval to the management company acquired in the Commonwealth transaction. The Company has transitioned the management of the operations of two properties to Heritage Senior Living, a partner who manages five joint venture properties in the Company's existing portfolio. As of November 13, 2019, 12 of the

13 properties have been transitioned from Greenfield. The Company is currently evaluating its options to transition the final property.

Other Recent Activity

On April 1, 2019, the Company exchanged its majority ownership interest in the operations of a property, located in Lansdale, PA, that was owned through a joint venture with Greenfield for their minority ownership interest in the real estate of the property resulting in the acquisition of control over the real estate. The transaction resulted in the consolidation of investment property of \$13,082 and assumption of mortgages payable of \$9,743.

On June 5, 2019, the Company contributed 8 properties to a newly formed joint venture, Jaguarundi Ventures, LP. The Company received \$23,000 from its joint venture partner in the arrangement in exchange for a 39.49% interest in the joint venture. The properties contributed had an investment property value of \$161,047 and total mortgage indebtedness of \$102,692.

On July 23, 2019, the Company entered subscription agreements in respect of the issuance of Class A Series 4 convertible preferred shares (the "Series 4 Preferred Shares") for aggregate proceeds of \$14,550. On August 27, 2019 the fourth series funded and resulted in the issuance of 1,538,461 Series 4 Preferred Shares.

On July 26, 2019, the Company entered into a credit agreement with affiliates of Magnetar for a principal amount of \$30,000, annual interest rate of 8.5%, and an initial maturity of one year with a one year extension option. The credit facility funded on July 26, 2019. The Company pledged its equity interests in properties located in Little Rock, AR; San Antonio, TX; and New Braunfels, TX against the loan.

Including all announced transactions as of November 13, 2019, the Company's portfolio composition by asset type based on forward looking net operating income projections is as follows:

Revenue

	Three months ended September 30,		Nine months ended September 30,	
	2019	2018	2019	2018
Contractual rental revenue	\$ 17,717	\$ 22,559	\$ 59,163	\$ 60,561

Other income	915	383	1,919	937
Total revenue	\$ 38,550	\$ 31,581	\$ 96,598	\$ 83,974

Contractual rentals received and straight-line rent adjustments relate to lease agreements under which the Company leases its investment properties to its tenants. Property tax recoveries represent the revenue recognized for the real estate taxes for which the tenants are primarily responsible to pay. CAM recoveries represent the recovery of common area maintenance expenses in investment properties that are not triple-net leased, primarily within the Company's medical office building portfolio. The decrease in rental revenue was primarily driven by eight properties that were contributed to a joint venture on June 5, 2019 and are no longer consolidated offset by the timing of the prior year acquisition of the medical office building portfolio on May 1, 2018. It was also impacted by three properties for which management was transitioned to Commonwealth and the intercompany revenue is eliminated in the Company's financial statements. In addition, for the nine month period ended September 30, 2019, the year over year changes were impacted by the prior year timing of the acquisition of Care Investment Trust, LLC ("Care"), which closed on February 1, 2018.

Resident rental and related revenue relates to operating revenue at the properties managed by Commonwealth, which were acquired on August 1, 2019. This revenue primarily consists of rental revenue paid by residents in the Company's owner occupied properties.

Lease revenue from joint ventures represents revenue earned under lease arrangements with four operating entities, which are jointly owned by the Company.

Other income for the three and nine months ended September 30, 2019 related primarily to parking income earned at the medical office buildings and management fee income earned from communities managed by Commonwealth but that are not owned by the Company. Commonwealth currently manages seven properties that are not owned by the Company. Other income for the three and nine months ended September 30, 2018 primarily related to parking income earned from the medical office building portfolio purchased on May 1, 2018 and the equity return earned on the investment in MS-SW Development Fund Holdings, LLC. The increase for the nine month period was due to the timing of the acquisition of the medical office building portfolio which closed May 1, 2018 and the management fee income earned by the Commonwealth management company.

Direct Property Operating Expenses

Direct property operating expenses consist of the following:

	Three months ended September 30, 2019			Three months ended September 30, 2018		
	Owner occupied property	Medical office buildings	Total	Owner occupied property	Medical office buildings	Total
Repairs and maintenance	\$ 211	\$ 345	\$ 556	\$ —	\$ 287	\$ 287

	<u>\$ 8,650</u>	<u>\$ 3,829</u>	<u>\$ 12,479</u>	<u>\$ —</u>	<u>\$ 1,942</u>	<u>\$ 1,942</u>

The direct property operating expenses relate to expenses at the 15 multi-tenant medical office buildings the Company acquired in the second quarter of 2018 and its 21 owner occupied properties. The owner occupied properties are managed by the Commonwealth management company and include the 17 Commonwealth properties acquired on August 1, 2019 and four properties that have been transitioned from Greenfield management to Commonwealth. Increases in both the three and nine month periods ended September 30, 2019 are due to the timing of the acquisitions.

Depreciation and amortization expense

Depreciation and amortization expense relates to the straight-line depreciation over the useful life of the Company's property, plant and equipment. The Company amortizes the value of in place leases over the average lease life.

Finance Costs from Operations

Finance costs from operations consist of the following:

	Three months ended September 30,		Nine months ended September 30,	
	2019	2018	2019	2018
Interest expense on credit facilities	\$ 6,645	\$ 4,520	\$ 15,718	\$ 11,541
Interest expense on mortgages payable	2,439	4,581	9,239	12,399
Interest expense on convertible debentures	1,312	879	3,936	2,004
Distributions on Exchangeable Units	20	—	20	—
Dividends on Commonwealth preferred units	573	—	573	—
Amortization and accretion expense	810	734	2,860	1,985
Interest rate swap receipts	(142)	(362)	(304)	(876)
Write-off of deferred financing costs from refinancing	13	—	82	—
Amortization of mark-to-market debt adjustments	22	22	66	57
Interest income from loans receivable	(990)	(834)	(2,581)	(2,383)
	\$ 10,702	\$ 9,540	\$ 29,609	\$ 24,727

Finance costs are primarily related to interest and amortization on the Company's credit facilities and mortgages payable. Interest expense on credit facilities increased in the three and nine months ended September 30, 2019 as compared to the prior year primarily due to additional borrowings, including the Commonwealth Facility, used to fund new property acquisitions and to repay individual property mortgage debt. Interest expense on mortgages payable decreased due to the impact of repaying individual property mortgage debt with funds from the credit facilities, as well as the impact of eight properties contributed to a joint venture which are no longer consolidated effective June 5, 2019. Interest expense on convertible debentures increased over the comparable prior year due to the 2018 Convertible Debentures issued August 24, 2018. The Commonwealth preferred units issued to fund the Commonwealth transaction earn an initial dividend rate of 6.50% per annum.

Real Estate Tax Expense & Change in Fair Value of Investment Properties - IFRIC 21

For the three and nine months ended September 30, 2019, real estate tax expense was \$527 and \$15,505 (three and nine months ended September 30, 2018 - \$1,810 and \$11,261), which represents property tax expensed for the year for properties owned on the tax assessment date (generally January 1), in accordance with the provisions of *IFRIC 21, Levies*. Real estate taxes are recovered from the Company's tenants under the provisions of their leases. The increase in real estate tax expense as compared to the prior year period is primarily due to additional properties acquired in the prior year.

The following table presents real estate tax expense and change in fair value of investment properties - IFRIC 21 together with property tax recoveries to show the net effect of real estate taxes on the Company's consolidated statements of income and comprehensive income for the periods presented. The expense in excess of property tax revenue is primarily due to properties that are not fully occupied, generally within the medical office building portfolio.

General and Administrative Expense

General and administrative expense consists of the following:

	Three months ended September 30,		Nine months ended September 30,	
	2019	2018	2019	2018
Compensation and benefits	\$ 2,158	\$ 1,798	\$ 5,356	\$ 4,464
Asset management and administrative fees	125	125	374	296
Professional fees	566	796	2,300	2,054
Deferred share compensation	671	365	1,804	1,042
Other	785	648	2,033	1,770
	<u>\$ 4,305</u>	<u>\$ 3,732</u>	<u>\$ 11,867</u>	<u>\$ 9,626</u>

Compensation and benefits expense includes the cost of salaries, bonuses, and benefits during the period. The increase in compensation and benefits expense is due to the compensation of the Commonwealth management company purchased during the Commonwealth acquisition.

Asset management fees relate to the contractual fee due under an asset management agreement with Mohawk to manage the Company's portfolio of medical office buildings. The asset management agreement has an initial term of two years.

Professional fees is comprised of costs incurred for external legal counsel, accounting fees and other professional services. The decrease in professional fees for the three month period ended September 30, 2019 as compared to the prior year period is primarily due to a reduction in legal services provided to the Company.

Deferred share compensation expense for the three and nine months ended September 30, 2019 increased over the prior year primarily due to increased amount of discretionary shares issued with respect to employee grants.

Other general and administrative expense primarily includes cost of insurance, fees earned by directors of the Company, travel and entertainment expense, investor relations, marketing, and foreign exchange loss (gain).

Transaction Costs for Business Combination

For the three and nine months ended September 30, 2019, the Company incurred transaction costs for business combination of \$2,564 and \$4,260, respectively, related to the acquisition of Commonwealth which was completed on August 1, 2019 and the anticipated acquisition of 100% of Greenfield's interests in 13 properties in which the Company already has an ownership interest. Transaction costs for business combination for the prior year comparable periods were \$6 and \$6,444, respectively, and included transaction costs incurred in relation to the acquisition of Care on February 1, 2018.

Diligence Costs for Transactions Not Pursued

The Company incurred diligence costs for transactions not pursued for the three and nine months ended September 30, 2019 of \$0 and \$633, respectively (three and nine months ended September 30, 2018 - \$1,971 and \$2,041, respectively) and included expenses related to the evaluation of investment opportunities that did not result in a purchase transaction. These costs are the result of investments which the Company ultimately decided were not in the best interest of its shareholders. The costs in the current year and prior year relate to different investment opportunities.

Allowance for Credit Losses on Loans and Interest Receivable

Allowance for credit losses on loans and interest receivable for the three and nine months ended September 30, 2019 was \$(152) and \$1,012, respectively (three and nine months ended September 30, 2018 - \$555 and \$2,529). The (recoveries) losses are related to a change in collectability estimates with respect to loans receivable and related interest receivables.

Change in Non-controlling Interest Liability

The change in non-controlling interest liability was an increase of \$189 and \$344 for the three and nine months ended September 30, 2019, respectively, (three and nine months ended September 30, 2018 - \$17,028 and \$17,807). These costs are the result of the portion of net income attributed to the non-controlling interest partners of the consolidated properties, and the decrease from the prior year periods is primarily due to non-cash fair value adjustments.

Change in Fair Value of Investment Properties

The change in fair value of investment properties was a decrease of \$(970) and \$8,751 for the three and nine months ended September 30, 2019, respectively, (three and nine months ended September 30, 2018 - \$29,082 increase and \$28,871 decrease, respectively). The change in fair value of investment properties was primarily driven by an adjustment to record investment properties at fair value based on the Company's estimate of fair value using level 3 inputs as of September 30, 2019.

Change in Fair Value of Financial Instruments

Change in fair value of financial instruments consists of the following:

	Three months ended September 30,		Nine months ended September 30,	
	2019	2018	2019	2018
Change in fair value of interest rate swaps	\$ 4,754	\$ (334)	\$ 14,089	\$ (1,825)

The change in fair value of financial instruments for the three and nine months ended September 30, 2019 and 2018 was primarily due to the change in fair value of interest rate swaps due to changes in variable interest rates. Interest rate swaps are used to manage interest costs on debt. The Company does not designate its interest rate swaps as hedges, and they are marked to fair value each reporting period through finance costs in the consolidated statements of income and other comprehensive income.

Income (loss) from Joint Ventures

	Three months ended September 30,		Nine months ended September 30,	
	2019	2018	2019	2018
Revenue	\$ 13,686	\$ 13,587	\$ 39,235	\$ 35,364
Property operating expense	(8,806)	(10,101)	(27,738)	(26,110)
Finance costs	(2,079)	(1,673)	(5,668)	(4,330)
Depreciation expense	(684)	(324)	(1,333)	(865)
Change in fair value of financial instruments	(1,486)	194	(3,944)	635
Change in fair value of investment properties	(1,724)	(709)	(12,696)	(1,321)
Income (loss) from joint ventures	\$ (1,093)	\$ 974	\$ (12,144)	\$ 3,373

Income (loss) from joint ventures represents the Company's share of net income from unconsolidated entities. The Company acquired an interest in 18 joint venture properties on February 1, 2018 as part of the acquisition of the Care portfolio. On June 5, 2019, the Company contributed its interest in eight properties to a joint venture and as a result the Company unconsolidated the properties. The Company has additionally obtained control of two of the Care portfolio properties and consolidated their results. The loss from joint ventures during the three and nine months ended September 30, 2019 is primarily related to the change in fair value of investment properties offset by income from operations.

Income Tax Expense/Recovery

For the Canadian and U.S. corporate subsidiaries of the Company, income tax expense/recovery is comprised of current and deferred tax. Certain of the Company's subsidiaries are limited partnerships and, accordingly, are not subject to income tax. Taxable income or loss of the partnerships is allocated to their partners.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

The Company anticipates that future current income tax expense will result from distributions from its U.S. subsidiaries to the Canadian corporation, which will be subject to a 5% withholding tax. No such distributions were made during the periods presented.

Other Comprehensive Income (Loss): Unrealized Gain (Loss) on Translation of Foreign Operations

Unrealized gain (loss) on translation of foreign operations for the three and nine months ended September 30, 2019 of \$799 and \$2,013, respectively, (three and nine months ended September 30, 2018 - \$1,156 and \$(596)) was due to the change in value of the Canadian dollar as compared to the U.S. dollar during the period.

Cash Flow Analysis

	Nine months ended September 30,	
	2019	2018
Cash provided by operating activities	\$ 2,891	\$ 16,150
Cash provided by financing activities	272,295	167,594
Cash used in investing activities	(289,468)	(184,955)
Decrease in cash and cash equivalents	\$ (14,282)	\$ (1,211)

Cash Provided by Operating Activities

Cash provided by operating activities decreased during the nine month period ended September 30, 2019 as compared to the prior year. The changes were primarily due to decreases in non-cash operating working capital, driven by a portion of accounts receivable from tenants which were satisfied by issuing loans receivable. The Company issued \$13,072 of loans receivable in satisfaction of rents due from tenants as part of its efforts to support the tenants with operating capital needs.

Cash Provided by Financing Activities

Cash provided by financing activities for the nine month period ended September 30, 2019 was \$272,295 as compared to \$167,594 in the prior year period. The current period cash provided by financing activities was primarily driven by net proceeds from the credit facilities and mortgage activity. In addition, the Company paid cash dividends of \$24,410 during the period.

Cash provided by financing activities in the nine month period ended September 30, 2018 included net proceeds from credit facilities and mortgages payable of \$100,670, proceeds of \$45,000 from the issuance of the Series 2 Preferred Shares in February of 2018 and Series 3 Preferred Shares in March of 2018, and proceeds of \$50,000 from the issuance of convertible debentures. These proceeds were offset by debt issuance costs incurred in association with new and refinanced mortgages of \$5,034 and cash dividends paid of \$25,438.

Cash Used in Investing Activities

Cash used in investing activities for the nine months ended September 30, 2019 was \$289,468. This was primarily due to \$89,381 used for property acquisitions and capital expenditures made during the nine month period. The Company also issued loans receivable for \$8,630, made a payment of \$9,676 to the previous owner of Care for its portion of the proceeds of the sale of the Traditions portfolio in December of 2018 and made cash contributions to investments in joint ventures. These uses of cash in investing activities were offset by the receipt of \$23,000 for the sale of an interest in the net assets contributed to the Jaguarundi joint venture and \$4,085 as repayment of loans receivable.

For the nine months ended September 30, 2018, the Company used \$180,223 for the acquisition of properties and capital expenditures. In addition, the Company issued loans receivable for \$14,336, received \$8,150 as repayment of mezzanine loans receivable and paid construction payables of \$4,600.

Financial Position

Total assets of \$1,550,029 are comprised primarily of \$1,029,509 of investment properties, which represents the estimated fair market value of the Company's portfolio of properties, including capital expenditures, and \$329,225 of property, plant and equipment, net as at September 30, 2019. Cash on hand at September 30, 2019 was \$12,696, total loans receivable were \$44,479, investments in joint ventures were \$99,357, and other assets were \$15,345. Total loans receivable includes \$19,777 of loans to the tenant operator Symcare. Other assets primarily consisted of \$275 of prepaid asset management fees, \$5,115 of security deposits and costs related to potential acquisitions, \$1,370 of escrows held by lenders, \$109 of income support receivable, \$2,421 of prepaid expense, \$2,282 of right-of-use asset, \$1,073 of bond assets and \$2,700 of other costs. Tenant and other receivables of \$19,418 is primarily comprised of real estate tax and rent receivables. The loans receivable balance related mainly to the issuance of loans for the development and operation of seniors housing and care properties in the United States and Canada.

Total liabilities of \$1,070,063 includes current liabilities of \$95,444 (see "Liquidity and Capital Resources" for additional information) and non-current liabilities of \$974,619. The current liabilities included \$14,287 of real estate taxes payable. Of the real estate taxes payable, \$863 related to the period prior to the Company's ownership of the respective properties, and the seller provided cash consideration at closing for this amount. Accounts payable and accrued liabilities represented \$12,291 of the balance in current liabilities. In addition, current liabilities included \$33,095 representing the current portion of mortgages payable, net of loan fees and \$3,338 of dividends payable. Non-current liabilities included \$202,987 representing the non-current portion of mortgages payable, net of loan fees; \$591,087 representing the non-current balance outstanding on the credit facilities, net of loan fees; \$90,715 of the convertible debentures, net of fees; \$51,969 of Commonwealth preferred unit liability; \$12,604 of derivative liability; \$3,073 of deferred tax liability; and \$4,428 of non-controlling interest liability. Other non-current liabilities of \$17,756 primarily consisted of security deposits received from tenants, lease liability, loan commitment liability and a liability related to deferred shares granted under the Company's deferred share incentive plan.

(1) Funds from operations and adjusted funds from operations, and related per share amounts, are supplemental measures which are not defined by IFRS. See "Financial Measures not Defined Under IFRS".

The Company's results for the past eight quarters have primarily been affected by the timing of additional property acquisitions, dispositions, transfers, changes in the fair value of investment properties and financial instruments and change in non-controlling interest liability. Refer to the "Recent Activities" section of this MD&A for details of the timing of property acquisitions.

Liquidity and Capital Resources

The Company's objectives when managing capital are to ensure sufficient liquidity to pursue its organic growth combined with strategic acquisitions and to maintain a flexible capital structure that optimizes the cost of capital at acceptable levels of risk while preserving the ability to meet financial obligations.

The capital of the Company consists of mortgages payable, credit facilities, convertible debentures, and shareholders' equity.

The Company expects to meet its working capital requirements with respect to accounts payable and accrued liabilities and dividends payable through cash on hand and operating cash flows. The majority of accrued real estate taxes will be paid by the Company's tenants under the triple net lease structures. As at September 30, 2019, current liabilities totaled \$95,444, exceeding current assets of \$44,528 and resulting in a working capital deficiency of \$50,916. The Company expects to be able to meet all of its obligations as they become due utilizing some or all of the following sources of liquidity: (i) cash flow generated from operations, (ii) credit facilities, under which \$34,750 was available as at September 30, 2019, (iii) property specific mortgages and refinancings, (iv) issuance of preferred shares, (v) issuance of convertible debentures, and (vi) issuance of common shares, subject to market conditions.

The Company, while considering externally imposed capital requirements, sets the amount of capital in proportion to risk and manages the capital structure and makes adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets. In managing its capital structure, the Company monitors performance throughout the period to ensure working capital requirements are funded from operations, available cash on deposit, and available financing. The Company may make changes to its capital structure in order to support the broader corporate strategy or in response to economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust its capital structure, the Company may issue equity or new debt, issue new debt with different characteristics to replace existing debt, or reduce the amount of existing debt.

The real estate industry is capital-intensive by nature. As a result, debt capital is an important aspect in managing the business. In addition, financial leverage is used to enhance terms from purchased real estate. The Company actively monitors debt maturities and available debt financing options.

Preferred Equity

The Company entered into subscription agreements in prior periods with respect to the issuance of class A convertible preferred shares to affiliates of Magnetar for aggregate gross proceeds of \$71,500, funded in multiple series. The purpose of the transaction was to raise proceeds to be used for the repayment of debt, general working capital purposes and to fund future acquisitions. The Company issued 7,560,137 preferred shares.

On July 23, 2019, the Company entered subscription agreements in respect of the issuance of Class A convertible preferred shares (the "Series 4 Preferred Shares") for aggregate proceeds of \$14,550. On August 27, 2019 the fourth series funded resulted in the issuance of 1,538,461 Series 4 Preferred Shares. The purpose of the transaction was to raise proceeds to be used for the second tranche of the Commonwealth transaction.

The Series 4 Preferred Shares are convertible into common shares at a conversion price of \$9.75. The other terms of the Series 4 Preferred Shares will be substantially similar to the terms of the Company's Class A convertible preferred shares that are currently outstanding, except that the liquidation preference of the Series 4 Preferred Shares will accrue at a rate of 9.80% for the first 24 months following the issuance of the Series 4 Preferred Shares and 12.25% thereafter; the prepayment penalty on liquidation, mandatory conversion and redemption will be 1% of the initial liquidation amount if the applicable event occurs within the first six months after issuance and 0.5% of the initial liquidation amount if the applicable event occurs between 6 months and one year following the issuance; and the Series 4 Preferred Shares will contain a limitation on converting to common shares, without prior approval of the Toronto Stock Exchange, if such conversion would result in the issuance of common shares equal to or exceeding 10% of the common shares outstanding on the date the Series 4 Preferred Shares are issued.

As at September 30, 2019, the Preferred Shares are convertible into 9,851,170 common shares of the Company. The weighted average accretion rate of the four series of preferred shares is 6.32%.

Debt Strategy and Indebtedness

Debt Strategy

The Company, taking into account availability of financing, market conditions, and the financial characteristics of the properties, seeks to maintain a combination of short, medium, and long-term debt maturities that are appropriate for the overall debt level of its portfolio. The Company utilizes conventional property-specific secured mortgages and secured floating rate bank financing, as well as unsecured and non-recourse financing. Management's objectives are to access the lowest cost debt with flexible terms, to diversify the Company's lender base, to have a large portion of debt with a fixed rate, and to have a debt maturity schedule spread over a time horizon which allows the Company to effectively manage interest rate risk and to be in a position to finance within the Company's target debt levels when investment opportunities become available. Management monitors the Company's debt by reviewing the debt to total assets ratio, interest coverage ratio, debt maturity schedule, and ratio of fixed versus floating rate debt. Over the long-term, the Company strives to have a portfolio with an average years to maturity of 5-8 years. The Company targets a long-term debt level of 50-55% of total assets, although from time to time it may carry a higher leverage ratio if market conditions present an opportunity to maximize shareholder value. The Company also targets a fixed rate debt level of 70-85% of its total debt, and a minimum fixed charge coverage ratio of 1.75.

To manage interest rate risk, the Company may enter into interest rate swap agreements from time to time. The Company does not designate its interest rate swaps as hedges, and they are marked to fair value each reporting period through change in fair value of financial instruments in the consolidated statements of income and other comprehensive income.

Weighted Average Interest Rate

During the period from September 30, 2017 to September 30, 2019, the one-month LIBOR rate has increased from 1.24% to 2.02%, or 78 basis points. During the same period the Company's weighted average interest rate for the comparable period has increased from 4.5% to 4.6% or 10 basis points. This highlights that the Company has been successful over this time in navigating a rising interest rate environment to maintain stable rates through effective use of interest rate swaps and strategic debt refinancings.

2016 Convertible Debentures

On December 16, 2016, the Company issued an aggregate principal amount of \$45,000 of convertible unsecured subordinated debentures (the "2016 Convertible Debentures"). The 2016 Convertible Debentures are due on January 31, 2022 and bear interest at an annual rate of 5.00%, payable semi-annually in arrears on July 31 and January 31 of each year and commencing on July 31, 2017. On May 6, 2019, \$25 of the 2016 Convertible Debentures were converted into 2,272 common shares.

2018 Convertible Debentures

On August 24, 2018, the Company issued an aggregate principal amount of \$50,000 of convertible unsecured subordinated debentures ("2018 Convertible Debentures"). The 2018 Convertible Debentures are due on September 30, 2023 and bear interest at an annual rate of 6.00% payable semi-annually in arrears on March 31 and September 30 of each year commencing on March 31, 2019.

Debt to Total Assets

Debt to total assets is calculated by dividing the total consolidated indebtedness, net of loan costs, by the total consolidated assets of the Company. At September 30, 2019, the Company's total consolidated indebtedness was approximately \$947,271, which represents 61.1% of total assets. Excluding the convertible debentures, total consolidated indebtedness was approximately \$856,556, which was 55.3% of total assets. Fixed rate debt represented approximately 85.5% of the Company's gross total indebtedness.

Fixed Charge Coverage Ratio

The Company's fixed charge coverage ratio is calculated by dividing earnings before interest, taxes, depreciation and amortization by certain fixed charges, which are comprised of interest expense payable in cash, regularly scheduled principal payments, and preferred dividends paid. For the period ended September 30, 2019, the fixed charge coverage ratio of the Company was 1.98.

Repayment Summary

Management attempts to stagger the maturity of the Company's fixed rate debt in order to achieve a distribution of maturities over a time horizon. This strategy reduces the Company's exposure to interest rate fluctuations on its fixed rate debt in any one period and reduces liquidity risk. From time to time, the Company will assume existing debt upon the acquisition of income properties, and the maturity of such debt may not fit within the overall target debt maturity profile of the Company.

Contractual Commitments

A summary of future contractual commitments as at September 30, 2019, including expected interest payments, is as follows:

	Total	Remaining 2019	2020	2021	2022	2023	Thereafter
Credit facilities principal	\$ 625,579	\$ —	\$ 30,000	\$ —	\$ 133,950	\$ 285,629	\$ 176,000

The credit facilities have an outstanding balance of \$620,474 as of September 30, 2019.

Mortgages payable are comprised of mortgages secured by individual investment properties.

Accounts payable consisted primarily of professional fees, other general and administrative costs payable, accrued interest, and other accrued costs.

Dividends payable relate to the September 2019 dividend declared.

Other non-current liabilities primarily relate to the issuance of deferred shares under the Company's deferred share incentive plan, lease liability and security deposits received from tenant operators.

On June 5, 2019, the Company entered into agreements to fund future loans to certain tenants of the Jaguarundi Ventures, LP joint venture. As at September 30, 2019, the Company is committed to fund an additional \$2,068 pursuant to these agreements. The Company has recorded an associated loan commitment liability representing the fair value of these commitments, which were made at interest rates below market value.

The Company remains committed to purchasing three additional properties as part of the Commonwealth transaction as previously announced, subject to the approval of certain lenders of secured debt underlying the remaining three properties. The three additional buildings have a total consideration of approximately \$55,000 that is expected to be funded by the assumption of debt of approximately \$34,800, the issuance of \$11,783 of preferred interests in the Company's acquiring subsidiary entity and cash on hand.

The Company agreed to terms with Greenfield Senior Living ("Greenfield") whereby the Company will acquire 100% of Greenfield's interests in 13 properties in which the Company already has an ownership interest for total consideration of approximately \$4,500. The Company has prepaid \$2,522 of the purchase price as at September 30, 2019.

Financial Instruments and Other Instruments

To manage interest rate risk, the Company may enter into interest rate swap agreements from time to time. Please refer to the "Debt Strategy and Indebtedness" section of this MD&A.

Off-Balance Sheet Items

There were no off-balance sheet items as of September 30, 2019.

Transactions Between Related Parties

The Company entered into subscription agreements in prior periods in respect of the issuance of class A convertible preferred shares to certain funds managed by Magnetar Financial LLC (collectively, "Magnetar"), a significant shareholder of the Company, funded in multiple series. The purpose of the transaction was to raise proceeds to be used for the repayment of debt, general working capital purposes and to fund future acquisitions. The Company issued 7,560,137 shares for aggregate gross proceeds of \$71,500.

On June 5, 2019, the Company formed a joint venture, Jaguarundi Ventures, LP, with Magnetar. The Company contributed eight properties to the newly formed joint venture and received \$23,000 from Magnetar in exchange for a 39.49% interest in the joint venture. As at September 30, 2019, the Company has a loan receivable from Jaguarundi Ventures, LP of \$6,153 recorded representing the funds owed to the Company from the repayment proceeds of a joint venture credit agreement with a tenant of the joint venture.

On July 23, 2019, the Company entered subscription agreements in respect of the issuance of the Series 4 Preferred Shares to Magnetar for aggregate proceeds of \$14,550. On August 27, 2019 the fourth series funded resulted in the issuance of 1,538,461 Series 4 Preferred Shares. The purpose of the transaction was to raise proceeds to be used for the second tranche of the Commonwealth transaction.

On July 26, 2019, the Company entered into a loan agreement with Magnetar for a principal amount of \$30,000, annual interest rate of 8.5%, and an initial maturity of one year with a one year extension option. The Company pledged its equity interests in properties located in Little Rock, AR; San Antonio, TX; and New Braunfels, TX against the loan.

Critical Accounting Estimates

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses throughout the period. Actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Information about assumptions and estimation uncertainties that may have a significant risk of resulting in a material adjustment within the next financial year are as follows:

Change in fair value of investment properties:

Acquired investment properties are initially measured at cost, including directly attributable acquisition costs, when the transactions are deemed to be asset acquisitions. Subsequent to initial recognition, investment properties are measured at fair value, determined based on available market evidence. The Company uses alternative valuation methods such as the direct capitalized income approach, discounted cash flow projections, or recent transaction prices (Level 3 inputs). The fair value of investment properties reflects rental income from current leases and assumptions about rental income from future leases based on current market conditions. The valuation of investment properties is one of the principal estimates and uncertainties of the Company. Refer to note 4 of the condensed consolidated interim financial statements of the Company for the period ended September 30, 2019 for further information on estimates and assumptions made in determination of the fair value of investment properties.

Impairment of loans receivable:

The Company reviews loans receivable on an ongoing basis to assess whether any loans should be classified as impaired and whether an allowance or write-off should be recorded. Allowances for impaired loans are recorded for individually

identified impaired loans to reduce their carrying value to the expected recoverable amount. To determine the amount, the Company expects to recover from an individually significant impaired loan, the Company uses the value of the estimated future cash flows discounted at the loan's original effective interest rate. The determination of estimated future cash flows of a collateralized impaired loan reflects the expected realization of the underlying security, net of expected costs and any amounts legally required to be paid to the borrower. Refer to note 2 of the condensed consolidated interim financial statements of the Company for the period ended September 30, 2019 for further information on estimates and assumptions made in determination of the impairment recorded on loans receivable.

Significant Accounting Policies and Changes in Accounting Policies

A summary of significant accounting policies and changes in accounting policies is set forth in notes 1 and 2, respectively, of the consolidated financial statements for the year ended December 31, 2018.

The following IFRS standards were adopted in 2019:

- (i) The Company adopted IFRS 16, Leases ("IFRS 16"), effective January 1, 2019 using the modified retrospective approach. On January 1, 2019 the Company recognized both a right-of-use asset and lease liability of \$1,490. There was no impact to equity as a result of the adoption of IFRS 16.
- (ii) On January 1, 2019, we adopted IFRIC Interpretation 23, Uncertainty over Income Tax Treatments ("IFRIC 23"), with no material impact on the Company's condensed consolidated interim financial statements.

These changes in accounting policies are further described in note 1 of the condensed consolidated interim financial statements for the period ended September 30, 2019. See also note 1 of the condensed consolidated interim financial statements for the period ended September 30, 2019 for the accounting policies adopted as a result of acquisitions made during the period.

Risks and Uncertainties

See "Risk Factors" in the Company's 2018 AIF for a discussion of risks that could materially affect the Company, which risk factors are incorporated herein by reference.

The Company has identified certain additional risk factors that exist in its business subsequent to the Commonwealth acquisition completed on August 1, 2019. As a result of this acquisition, the Company will own the management company responsible for operating seniors housing properties. As of the date of this MD&A, the Company manages operations for 27 properties in its portfolio.

Business Risks

The Company, through its ownership in the Commonwealth management company, is subject to general business risks and risks inherent to the seniors housing industry, including fluctuations in occupancy levels, increases in labor and other operating costs, competition from other similar properties and service providers, health-related risks, the potential for unfavorable changes to regulations, the imposition of new or increased taxes and capital expenditure requirements.

Competition

Other managers and owners of seniors housing properties compete with the Company in seeking residents. The existence of this competition may adversely affect the Company's ability to find residents and the level of rents the Company is able to charge, which could have an adverse affect on the Company's revenue.

Labor Costs

The management company competes in local markets with other seniors housing providers with respect to attracting and retaining qualified employees. It is dependent on the available labor pool of employees to provide the care its residents require. A shortage of labor supply or changes in the labor market may require more costly wage and benefits packages in order to compete. No assurance can be given that labor costs will not increase, or if they do increase, that they can be offset by corresponding increases in rental revenue or other cost savings.

Controls and Procedures

We are committed to maintaining effective disclosure controls and procedures and internal control over financial reporting. A control system, no matter how well conceived and operated, can provide only reasonable, and not absolute, assurance that its objectives are met. As a result of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, including instances of fraud, if any, have been detected. These inherent limitations include, among other items: (i) that management's assumptions and judgments could ultimately prove to be incorrect under varying conditions and circumstances and (ii) the impact of isolated errors. Additionally, controls may be circumvented by the unauthorized acts of individuals, by the collusion of two or more people, or by management override. The design of any system of controls is also based, in part, upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential conditions.

Disclosure Controls and Procedures

Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed is recorded, processed, summarized, and reported within the time periods specified under Canadian securities laws and to include controls and procedures that are designed to ensure that information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Internal Controls Over Financial Reporting

We are responsible for establishing and maintaining adequate internal controls over financial reporting to provide reasonable assurance about the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The Chief Executive Officer and the Chief Financial Officer assessed, or caused an assessment under their direct supervision of the design of our internal controls over financial reporting as at September 30, 2019, and based on that assessment, they determined that the Company's internal controls over financial reporting were appropriately designed in accordance with the 2013 COSO framework as published by the Committee of Sponsoring Organizations of the Treadway Commission.

There were no changes in internal controls over financial reporting that occurred during the three and nine months ended September 30, 2019 that have materially affected or are reasonably likely to materially affect the Company's internal controls over financial reporting.

Outstanding Shares

As of November 13, 2019, 54,476,694 common shares in the capital of the Company were issued and outstanding.

Each 2016 Convertible Debenture is convertible into freely tradable common shares of the Company at the option of the holder at any time prior to the earlier of January 31, 2022 and the last business day immediately preceding the date specified by the Company for redemption, at a conversion price of \$11.00 per common share. If all outstanding 2016 Convertible Debenture were converted into common shares of the Company, it would result in the issuance of 4,088,637 additional common shares.

Each 2018 Convertible Debenture is convertible into freely tradable common shares of the Company at the option of the holder on or after September 30, 2021, and prior to September 30, 2022 at a conversion price of \$10.70 per common share. If all outstanding 2018 Convertible Debenture were converted into common shares of the Company, it would result in the issuance of 4,672,897 additional common shares.

As of November 13, 2019, there were 2,802,009 Series 1 Preferred Shares outstanding, 3,172,086 Series 2 Preferred Shares outstanding, 1,586,042 Series 3 Preferred Shares and 1,538,461 Class A Series 4 Preferred Shares. The Series 1 Preferred Shares, Series 2 Preferred Shares, Series 3 Preferred Shares, and Series 4 Preferred Shares are convertible into freely tradable common shares of the Company. As of November 13, 2019, assuming the voluntary conversion of all of the Series 1 Preferred Shares, Series 2 Preferred Shares, Series 3 Preferred Shares, and Series 4 Preferred Shares then outstanding, a total of 9,851,170 common shares would be issued.

As of November 13, 2019, assuming the voluntary conversion of all of the Exchangeable Units, a total of 327,869 common shares would be issued.

As of November 13, 2019, assuming the voluntary conversion of all of the Commonwealth preferred units, a total of 5,496,103 common shares would be issued.

Financial Measures

Funds From Operations ("FFO") and Adjusted Funds From Operations ("AFFO") are supplemental measures used by management to track the Company's performance. Management believes these terms reflect the operating performance and cash flow of the Company. The Company believes that AFFO and AFFO per share provide the most effective metric by which to evaluate the performance of the Company and to most accurately identify the cash flows available for distribution to shareholders.

Funds From Operations

FFO means net income in accordance with IFRS, (i) plus or minus fair value adjustments of investment properties; (ii) plus or minus gains or losses from sales of investment properties; (iii) plus or minus certain other fair value adjustments; (iv) plus transaction costs expensed as a result of the purchase of property being accounted for as a business combination; (v) plus property taxes accounted for under IFRIC 21; (vi) plus allowance for credit losses on loans and interest receivable; (vii) plus deferred income tax expense, after adjustments for equity accounted entities calculated to reflect FFO on the same basis as consolidated properties and adjustments for non-controlling interests. The use of FFO, a non-IFRS measure, combined with the required IFRS presentations, has been included for the purpose of improving the understanding of the operating results of the Company. FFO presents an operating performance measure that provides a perspective on the financial performance that is not immediately apparent from net income determined in accordance with IFRS.

FFO is a financial measure not defined under IFRS, and FFO, as presented herein, may not be comparable to similar measures presented by other real estate investment trusts or real estate enterprises.

To the extent the Company's 2016 Convertible Debentures and 2018 Convertible Debentures were dilutive to FFO per share, the related interest, amortization, and accretion expense has been added back to calculate a diluted FFO for purposes of calculating diluted FFO per share.

The Company's FFO is calculated as follows (in thousands of U.S. dollars):

	Three months ended September 30,		Nine months ended September 30,	
	2019	2018	2019	2018

(1) Interest, amortization and accretion on convertible units include 2016 Convertible Debentures, 2018 Convertible Debentures, Commonwealth preferred interest, and Exchangeable Units.

(2) Convertible units include 2016 Convertible Debentures, 2018 Convertible Debentures, Preferred Shares, Commonwealth preferred interest, and Exchangeable Units.

Adjusted Funds From Operations

The Company maintains the view that AFFO is an effective measure of cash generated from operations, after providing for certain adjustments. AFFO means cash provided by operating activities, subject to certain adjustments, which include: (i) adjustments for certain non-cash working capital items that are not considered indicative of sustainable economic cash flow available for distribution; (ii) adjustments for interest expense on the credit facilities and mortgages payable that is included in finance costs; (iii) adjustments for cash paid for interest; (iv) add backs for compensation expense related to the Company's deferred share incentive plan; (v) add backs for payments received under the Company's income support agreements and development lease arrangements; (vi) add backs for the write-off of deferred financing costs from refinancing; and (vii) other adjustments as determined by the directors of the Company in their sole discretion.

AFFO is a financial measure not defined under IFRS, and AFFO, as presented herein, may not be comparable to similar measures presented by other real estate investment trusts or real estate enterprises.

To the extent the Company's 2016 Convertible Debentures and 2018 Convertible Debentures were dilutive to AFFO per share, the related interest has been added back to calculate a diluted AFFO for purposes of calculating diluted AFFO per share.

The Company's AFFO is calculated as follows (in thousands of U.S. dollars):

(1) Includes interest expense on the credit facilities, mortgages payable, convertible debentures, interest rate swaps, write off of deferred financing costs from refinancing and interest income earned on notes receivable included in finance costs.

(2) Payout ratio is calculated by dividing the common share dividends declared by AFFO. Effective payout ratio is calculated by dividing common share dividends payable in cash, as adjusted for Dividend Reinvestment Plan ("DRIP") participation, by AFFO.

(3) Interest on convertible units include 2016 Convertible Debentures, 2018 Convertible Debentures, Commonwealth preferred interest, and Exchangeable Units.

(4) Convertible units include 2016 Convertible Debentures, 2018 Convertible Debentures, Preferred Shares, Commonwealth preferred interest, and Exchangeable Units.

The Company entered into leases, each with 18 year terms, on two properties in Houston, Texas in which cash rent over the initial 12-18 month term was set to approximate debt service on the corresponding property. After the initial period, the leases will escalate to full yield. The lease structure on the first property transitioned to full yield in February of 2019. The second of these properties is expected to return to full yield by January of 2020.

The Company deducts a capital maintenance reserve in its calculation of AFFO based on estimated quarterly expenditures related to sustaining and maintaining existing space. Expenditures that are related to new development or revenue enhancing renovations are excluded from this calculation.

Cash Dividends

	Three months ended September 30,		Nine months ended September 30,	
	2019	2018	2019	2018
Cash flows provided by operating activities	\$ 1,950	\$ 7,231	\$ 2,891	\$ 16,150
Net income (loss)	(2,346)	8,654	(12,043)	21,500
Total dividends declared	9,998	9,750	29,718	27,244
Shortfall of cash provided by operating activities over total dividends	(8,048)	(2,519)	(26,827)	(11,094)
Shortfall of net income over total dividends	(12,344)	(1,096)	(41,761)	(5,744)

Total dividends for the three and nine months ended September 30, 2019 exceeded cash flows provided by operating activities largely due to working capital changes and cash flow from joint arrangements, which may be realized in the form of cash distributions to meet future cash needs. Non-cash items relating to fair value adjustments of investment properties and the Company's financial instruments, amortization of financing costs and deferred income tax expense are deducted from or added to net income and have no impact on cash available to pay current dividends. Total dividends for the three and nine months ended September 30, 2019 exceeded net income primarily due to non-cash items. Of the \$9,998 dividends declared in the three months ended September 30, 2019, \$1,938 was satisfied in the form of shares issued through the Dividend Reinvestment Plan ("DRIP"). The resulting cash provided by operating activities in shortfall of cash dividends for the three months ended September 30, 2019 is \$(6,110) and the shortfall of net income over cash dividends is \$(10,406). Of the \$29,718 dividends declared in the nine months ended September 30, 2019, \$5,769 was satisfied in the form of shares issued through the DRIP. The resulting cash provided by operating activities in shortfall of cash dividends for the nine months ended September 30, 2019 is \$(21,058) and the shortfall of net income over cash dividends is \$(35,992).

The Company believes its current distributions are sustainable.

Operational Measures

The Company reports on certain metrics related to the underlying operations in its stabilized income properties. The Company has defined stabilized income properties as follows:

Long-term care facilities and transitional care properties - stabilized upon the earlier of 80% occupancy at the underlying operating level for two consecutive quarters and 24 months after opening.

Assisted living facilities - stabilized upon the earlier of 90% occupancy for two consecutive quarters and 36 months after opening.

Medical office buildings - stabilized upon the earlier of 90% occupancy, measured in physical occupancy of greater than 90% of the rentable square footage in the building, for two consecutive quarters and 36 months after opening.

Stabilized properties generally include any triple-net lease property unless it is:

1. A new development that is not yet complete,
2. Not yet stabilized and within 12 months of the above criteria,
3. Newly acquired and/or undergoing a major renovation or otherwise being repositioned or in transition to a new operator, or
4. Held for sale.

The Company believes relevant metrics for evaluating the performance of the underlying operations in stable, triple-net leased assets include operator lease coverage and occupancy. The Company's operator performance metrics are calculated utilizing data that is one quarter in arrears (i.e. as of and through June 30, 2019 for this reporting period), and, where master leases are in place for portfolios of multiple asset types, using allocated rents pursuant to consistent methodologies.

All operator data is made available solely from information as provided by the operators and has not been independently verified by the Company.

Triple Net Lease Portfolio

The Company's triple net lease portfolio consists of 61 consolidated seniors housing and care properties and 8 seniors housing and care properties held in joint arrangements which are leased to operators on a long-term, triple net basis. Under a triple net lease structure, the tenant operators assume the operational risks and expenses associated with operating the facility. The Company's triple net leased portfolio has an average lease term to maturity, excluding renewal options, of 12.6 years.

Approximately 92% of the Company's forward 12 month rent from unaffiliated tenants in the triple net lease portfolio is currently subject to a master-lease or is subject to a lease where the Company has the right to consolidate multiple leases into a single master-lease.

Operator Lease Coverage

Operator lease coverage is a measure of a tenant's ability to meet their cash rent and other obligations during its normal course of business. The Company believes that both EBITDAR and EBITDARM (as defined below) provide insight to the core operations at the facility level. Metrics provided below are for the trailing 12 month ("TTM") period for all stabilized assets. The stabilized triple-net lease portfolio through June 30, 2019 includes 43 properties.

For purposes of the TTM calculations, the Company has included only the period for which the stabilized properties have been owned by the Company and, therefore, the TTM metrics shown may include less than 12 months in the calculations. The metrics presented below represent all stabilized income properties, which includes assist living, independent living, long-term care, and transitional care properties.

EBITDAR (earnings before interest, income taxes, depreciation, amortization, and rent) lease coverage is calculated by dividing the TTM EBITDAR generated by corresponding cash rent due over the same period. The Company's stabilized portfolio generated EBITDAR lease coverage of 1.2.

EBITDARM (earnings before interest, income taxes, depreciation, amortization, rent, and management fees) lease coverage is also used by the Company. Together with EBITDAR lease coverage, EBITDARM lease coverage allows the Company to evaluate operations at each property by eliminating management fees, which can vary based on the operator/tenant and its negotiated structure with the Company. The Company believes EBITDARM is valuable because it isolates operational performance to the results of the direct operations within the facility. The Company's stabilized portfolio generated EBITDARM lease coverage of 1.5.

Through certain of its leases with operators, the Company has the ability to claw back the management fees that the operator is able to pay. This provision in the leases is enforceable when certain performance metrics are not met, as defined within the lease agreements. This mechanism further enhances the Company's position relative to the performance and risk mitigation within the portfolio.

Operator Occupancy

The Company also utilizes operator occupancy percentage to evaluate underlying operations within the portfolio. Occupancy percentage is calculated by dividing the actual number of revenue generated days occupied during the period by the maximum available revenue days available for the period. Metrics provided below are for the TTM period for all stabilized assets based on the Company's definition of stabilization.

For the TTM period ended June 30, 2019, the Company's stabilized portfolio had an occupancy percentage of 85%.

Seniors Housing Operating Properties

The Company's seniors housing operating property ("SHOP") portfolio consists of 21 consolidated properties in which the Company wholly owns both the operations and the real estate of each community, and also owns a majority interest in the management company that provides management services to each community. The SHOP portfolio also includes 16 properties the Company owns an interest in both the operations and real estate through joint arrangements and where management services are provided to each community by a third party management company.

Based upon the Company's ownership structure in these assets, the Company believes the most relevant operational metrics include occupancy and year over year revenue and net operating income growth metrics. For the period ended June 30, 2019,

the occupancy in the stabilized SHOP portfolio was 88%. As comparative and sufficient ownership periods become available in the Company's ownership period, the Company anticipates that additional metrics will be included in future filings.

Medical Office Building Portfolio

The Company's medical office building portfolio consists of 15 multi tenant medical office buildings in which the Company has full ownership of the property. The Company's stabilized medical office building portfolio consists of 11 properties through June 30, 2019 in the United States and Canada.

The Company utilizes occupancy as a percentage of gross leasable area in addition to other financial metrics when evaluating performance in its medical office building portfolio. For the period ended June 30, 2019, occupancy in the stabilized medical office building portfolio was 92%. As comparative periods become available in the Company's ownership period, the Company anticipates that additional metrics will be included in future filings.
